

### QUALITY SYSTEM

Concerning the quality, our company has created a work flow system very strict, well structured and proceeded to smallest the steps of production.

The procedures of quality insurance are established in detail for each part of the technological process, and they are made according to the steps of operations on the stitching line, emphasizing on the key points that have to be checked very strictly and on the sewing machines and devices necessary for accomplishing each garment.

For every new garment we do the pre-production sample which is approved by

the customer, and we made sure that we deliver the full order in the same good quality as the pre-production.

We do an interprocess quality check on the line in the established key points, and we inspect two times the finished garments. In our full activity we did not have any quality or delivery problem, and we can enforce this any time with recommendations from our clients.

### CONCLUSIONS:

All the above factors have contributed for Jenson Confecții to become a important manufacturer with this profile in Eastern Europe. Jenson is a dynamic, young, full expanding company, but in the same time a company which offers experience, professionalism, correctitude and seriosity.

No matter if you are a trade manager, agriculture or industrial investor, hospital manager, or commandant of a military organization, director of a public institution, we are convinced that you will find in our offer a product that will meet your requirements.
